About This Software

Share the heavy lifting of intense programs and keep virtual activities separate, but connected seamlessly between two computers. This versatile, secure, and affordable software solution lets you control two machines using one keyboard and mouse without the hassle of extra cables or the hardware needed for a traditional switch.

Creatives love the ability to retain their formatting when they use Multiplicity to seamlessly copy and paste content from one PC to another. Designers and editors alike use seamless mode to run editing programs alongside their intense graphic design applications without experiencing lag, stutter, or drop in frame rate. Audio sharing lets you listen to sound from both PCs without switching headsets and speakers.

If you run two computers when you're gaming, streaming, or video-sharing, Multiplicity can keep your PC running optimally. Use your laptop or another machine for additional tasks while you play without having to constantly switch back and forth between keyboards.

Multiplicity's seamless mode allows you to establish a keyboard and mouse connection between your two computers while they're adjacent to each other and on the same network. You can stack your displays and move easily between them, or create a virtual laptop "docking space" that will easily reconnect every time it comes back within proximity.

If you use multiple PCs on a regular basis, Multiplicity is the solution you've been looking for.

Features:

-
- Switch seamlessly between 2 PCs with one mouse and keyboard
 - Copy and paste files, folders, text, and images between PCs
 - Hot Keys for quick access to other PCs
 - Listen to audio from multiple PCs through one PC

Title: Multiplicity

Genre: Accounting, Animation & Modeling, Audio Production, Design & Illustration, Education, Photo Editing, Software Training, Utilities, Video Production, Web Publishing

Developer:

Stardock

Publisher:

Stardock

Franchise:

Object Desktop

Release Date: 7 Sep, 2017

English

Needs a single-player mode.. I'm sure the game would be fine...if it was in English. Half of it is in poorly translated english which I can tolerate, but the other half is in Chinese. I don't speak Chinese. So for the short time I played it I couldn't process what I was doing at all.. I'll keep this one short (I know, I always promise that, but this time, I swear).

This is a really fun puzzle game. Solving the levels results in a truly satisfying camera shot of all of the bits of the puzzle you've broken/exploded falling to the bottom of whatever otherworldly container all of this takes place in. It's pretty, the controls are simple to learn, and new concepts are introduced at a steady, appropriate pace. There are enough levels to keep things interesting, but not so many that you feel like it's a hill you'll never climb.

Most importantly, solving these puzzles is actually fun, not frustrating...even when you're stuck. It's entertaining to play with the levels and figure things out. I liked it enough to go back and get the extra achievements for solving certain levels with a reduced number of balls so that I could 100% the game. I won't bother doing that if the game isn't fun.

At 99 cents US, this is a steal. I can't even buy a soda for that much money any more. I got a couple hours' worth of entertainment for only a buck, and that more than justifies a thumbs-up from me.. This is the best game ive ever seen. A very solid solitaire game. There's purchase-ables. Some abilities, like how many cards are in the deck OR a warning that you missed a card and need to undo, are all purchase only ... not much free at the start. It's challenging to get a perfect on each hand, but so far it has been possible.

The jokes, save for a few, are real groaners. However, the football theme is still decent. It scratches that solitaire itch for those that finished Regency Solitaire, Shadowhand, etc. I would buy it again.. Awsome time passing game and the music is epic. This game is extremely hard. Probably the hardest single player game I have played on steam. The narrator is really annoying and he will\u2665\u2665\u2665\u2665\u2665\u2665you off. I was really salty when I couldn't beat the first level after 20 minutes, but I just couldn't stop playing because in all honesty it is a fun game. I wish the narrator didn't repeat the same thing over and over and the beginning of most levels, but after all, he is supposed to be a\u2665\u2665\u2665\u2665\u2665 All in all though, I do recommend this game and even though it makes me want to kill myself it is really fun.. Fantastic game, fine puzzles, amazing scenery, gripping story, new aspect on mystery solving (I especially liked that).
Worth every penny. 10/10

Track List:

- 01 The City of Brass - 00:00:59
- 02 Grandeur of the City - 00:02:03
- 03 Fight For Your Life - 00:01:11
- 04 Biding Your Time - 00:00:58
- 05 Out of Time - 00:01:15

06 Breaking the Curse - 00:01:05. As a person who played and also reviewed the first game as well, this time I see the game is much more functional and richer. This time there are 24 new girls. The art, music and all other effects are pretty cool. They resolved the background issues from the first game, it is less painful for the eyes now. And I am so glad to see that they finally added a reference picture as it should be in a real jigsaw puzzle environment. The timer and faded copy image are now optional, which are also other nice improvements. There is also a score system depends on these two features. Your score gets higher if you enable timer and disable copy image. I think it is the best jigsaw game available on Steam, but could be better if they also add a feature like rotating puzzle pieces.. No players or bots in game Refund it. Just a rehash of the existing 377 with the brighton mainline but in fcc and an unbranded livery. Would have been nice to have included a thameslink livery as an update but of course not dtg made this remember. Also on UKTS there is a freeware variant and i think when you get the london to brighton scenario pack on armstrong powehouse you get an fcc 377 too.. Pretty good and pretty scary. But it's still much better and scary Amnesia The Dark Descent.

The value for this game: 6.5 √ 10..

good\u2665\u2665\u2665\u2665\u2665\u2665go\u0c66\u0501\u2665\u2665\u2665\u2665\u2665\u2665

\u041d00\u041e\u0b2000000\u041e\u0b20\u0b20000\u1d52\u1d52\u1d52\u1d52\u1d52\u1d52\u1d52\u1d52

Good\u2665\u2665\u2665\u2665\u2665. If you love fantasy worlds, beautify pictures, lots of hidden objects and puzzles, then go for any Dark Parable games. They are definitely worth the time. Loved all of them, especially the Red Riding Hood Sisters. Great.. I once wrote a rather mean review of this game because it didn't have decent joystick support. Now it has perfect joystick support, but the game is just... kinda shallow and boring. The enemies aren't terribly varied, and the rooms generated for gameplay don't create any sort of challenge or depth. I wouldn't even mind how slow it is if I felt like I had somewhere to go.

It's just kind of amateur. There's a hub world, but it's purely functional and eats up time; could have been just a menu. There's a "crafting" system, but your resources don't vary (since they come from a set number of enemies). There's no real quests or goals which is weird since they put so much time into the world. It's the classic issue where all the surface content-- the theming, the design, the "hilarious" narrator --was developed without a compelling game to put it on.

I'd advise the crew to consider adding one of those "souls-likes" everyone is into, or to check out "Radiant Inferno" for an idea of how a game like this could work better. It has the *opposite* problem. A fun, involving shooter that's just boring to look at. \u2612. Great DLC, mutiplayer doesnt work very well but the devs are listening and trying to the problems at hand.
